

About the Conference

The conference strives to bridge the gap between Industry, Academia and Researchers with emerging technologies. The conference provides a forum for the Researchers, Industry Professionals, Academicians and Students to discover and publish their innovative solutions for real time problems.

The National Conference on Multidisciplinary Approaches in Engineering, Social Sciences, Humanities & Management covers a wide array of advanced techniques and methodologies in the defined areas. This conference serves as a platform for researchers, academics, and practitioners to share their findings, discuss challenges, and explore new directions in these diverse fields.

ESHM-2024 conference will be conducted in both online and offline modes. The conference provides a platform for Researchers, Industry Professionals, Academicians and Students across the globe to share their research innovative ideas. This conference creates the platform to discuss future research directions, find solutions for existing complex technological challenges and build networks for further research collaboration. The conference seeks submission of novel research work from Practicing Engineers, Technologists, Scientists from R & D Institutions, Research Scholars, Faculty members and Students.
