

About International Conference

Basic sciences, with their focus on fundamental scientific knowledge, empower us to discover innovative solutions and address potential future challenges. Developing expertise in basic science hinges on exceptional education at all levels and the presence of top-notch universities and research centers. Basic sciences play a crucial role in implementing this program. The conference's agenda encompasses key topics such as the significance of basic sciences in sustainable development, their applications and innovations in medicine, engineering, technology, mathematics, and physics. It also covers advanced research in chemistry and biology, interdisciplinary basic research, healthcare, water and food security, as well as their applications in engineering and technology.
